<tr>
<td>5-Year Old Machine</td>
<td>2871 kWh per year</td>
<td>$159.71 +102%</td>
</tr>
</tbody>
</table>

Based on the national average cost per kWh in January 2008 of $0.1103/kWh. Actual energy usage may vary based on environmental conditions.

Only BevMax4 has been designed to enhance the consumer experience and meet the operational needs of bottlers and vending operators.

### RELIABILITY.
The most reliable, dependable vending solution proven by independent lab tests of 20,000 operating vends; 80,000 vend life-cycles and comprehensive field testing exceeding 238,000 vends.

### VARIETY.
Reduce sold-out column potential. Add more facings of high turnover products. Create more variety to appeal to broad consumer segments and daypart consumption. Make more efficient, bigger case drops.

### EFFICIENCY.
A “shrinkless” vend mechanism addresses costly labor and service concerns. Load any package in any position. Eliminate loading errors. Load fast with both hands. Bottles remain firmly in place (even if the machine is rocked).

### SPEED.
Who likes to wait in line? BevMax4 delivers product in only 8-seconds. Faster delivery time increases sales; speed of service and customer satisfaction.

### SIMPLIFIED MAINTENANCE
Low profile modular refrigeration platform removes from the front or the back of the machine.
