

**CRANE** CASHLESS

# Navigator Touch for Crane Cashless

The Navigator Touch retrofit screen adds a new dimension to your existing vending machines, improving Cashless return on investment with digital advertising and increased loyalty participation driving sales 10 percent higher than cashless alone.

This easy-to-install retrofit device will deliver a better customer service experience with nutritional information and automatic refunds. Engage consumers, drive sales, and maximize your technology investment with the telemeter you already have.

# Navigator Touch

## DIGITAL ADVERTISING:

Get vending's most innovative digital advertising experience with the telemeter you already have. Attracts and engages consumers with full motion video, increases advertised sales and drives incremental revenue.

## AUTOMATIC REFUNDS:

Delivers a better customer service experience by providing contact information, delivering feedback when something goes wrong and allowing consumers to request refunds. Consumers get refund information sent to their mobile device while operators maintain total control of the experience with the ability to configure refunds by location.

## PRODUCT INFORMATION:

Displays nutritional information for consumers. Planogram, price changes and nutritional information are updated remotely via the Streamware Connect Portal or via VendMAX synchronization.

## REMOTE MANAGEMENT:

Everything managed over-the-air with no on-site configuration required. Automatically picks up configuration of the telemeter to which it is assigned.

## LOYALTY INFORMATION:

Automatically displays current loyalty offers through daily syncs based on the planogram in the machine.
